What's New in the Free PDF To Flash SWF?

Free PDF to Flash SWF is a straightforward piece of software that enables users to quickly turn PDF documents into Flash files (SWF format), as the name suggests. It does not come packed with complicated options or configuration settings, so the app can be used with confidence even by those with little or no experience in PDF conversion applications. Installing the program takes little time and minimum effort. Its interface is clean and intuitive, thanks to the standard window with the neatly organized structure. PDF documents can be selected for conversion by using either the file browser or drag-and-drop method. Batch processing is not possible, unfortunately, which means you can work with only one item at the time. Once the source file is specified, it is necessary to point out the saving directory and output file name immediately, in order to proceed with the conversion job. Once it finishes, Free PDF to Flash SWF offers to open the output folder. There are no other notable features available through this software utility. Free PDF to Flash SWF has a good response time and carries out conversion jobs rapidly. We have not come across any kind of issues throughout our evaluation, since the tool did not freeze, crash or display error messages. However, it is not pretty resourceful. The fact the batch processing is not supported is a pretty notable downside, for instance. Nevertheless, Free PDF to Flash SWF offers a simple solution to creating SWF files from PDF documents.
