What's New in the Defencebyte Anti-Ransomware?

DefenseByte Anti-Ransomware is a highly capable anti-ransomware app that provides users with a multitude of features to help them in their fight against malware attacks. Yaris is a

simple yet strong ransomware application that was designed to hijack all the time-related processes on a computer system to collect ransom. Trojan:Yaris.gen is very dangerous virus that is included in various free online games, and is one of the most efficient ways to spread ransomware. Yaris is also able to access the victim's microphone, camera and/or mobile phone and infect their device with data and

create a ransom note. The program encrypts the data on your computer and displays a ransom message. The main advantage of Yaris is that it is a multi-thread virus, so it can hide itself while running, and it also has the ability to rename itself. Yaris encrypts the following files:

Attachment.Yaris .doc .xls .ppt .pps
.rtf .pdf .txt .jpg .jpeg .png .ai .eps
.svg .bmp .eps .xps Yaris can run on
the following versions of Windows:

Microsoft Windows XP Microsoft

Windows 7 Microsoft Windows 8

Microsoft Windows Server 2003

Microsoft Windows Server 2008

Yaris will also run on the following
operating systems: Windows 2000

Windows Vista Windows 7 Yaris

will also run on the following

Microsoft Office versions:

Microsoft Office 2003 Microsoft

Office XP Microsoft Office 2007

Microsoft Office 2010 Yaris has a

simple interface that is easy to use. When the infection takes place, the Yaris ransomware will download the following files to the user's computer system: %.dat %.doc %.xls %.ppt
%.pps %.rtf %.pdf %.txt %.jpg
%.jpeg %.png %.ai %.eps %.xps
Enigma:Scepter.W32.H is a ransomware program that is extremely hard to detect, due to the fact that it uses many different ways to hide itself. It does this by

modifying the appearance of your desktop, renaming all files, folders, and other directories, and encrypting your files. After this process is completed, your computer will shut down and display a ransom note, displaying the word “Keep in mind, We are waiting for you”. The program will then give the user the option to “keep” or “stop” encrypting their files, and will give them an option to purchase a special

decryption key. The main advantage of this program is the fact that it&
