Aluminum mill films with excellent physical and mechanical properties, high strength, and excellent electrochemical properties have recently been developed, and commercialization of these films has started. These films are used in various fields such as, for example, various parts of automobiles. Among other aluminum-base films, a bilayer-structured aluminum/silicon nitride film is characterized in that, compared to aluminum/silicon oxide films, silicon nitride is less likely to react to aluminum, the bonding strength between the silicon nitride and aluminum is excellent, and the cohesive energy of aluminum is higher than that of silicon oxide. The film quality of an aluminum/silicon nitride film is generally excellent, and is strongly affected by the silicon nitride film quality. The bonding strength between aluminum and silicon nitride is generally stronger than that between aluminum and silicon oxide. It

---

is thus expected that an aluminum/silicon nitride film can be used advantageously as an undercoat layer for an aluminum or silicon substrate in which the presence of a defect or oxygen makes the adhesion between aluminum and silicon less secure. However, when an aluminum film is formed on a silicon nitride film, aluminum nitride generally forms at the interface with the silicon nitride, and there is a problem in that the adhesion between aluminum and silicon nitride is markedly decreased. The present inventors have previously proposed in Patent Literature 1 a process for forming an aluminum/silicon nitride multilayer film, comprising the steps of sputtering a target containing silicon in a mixed gas atmosphere comprising a nitrogen gas and a gas containing at least an aluminum gas and at least one of oxygen and carbon, while maintaining the ratio  $(\text{Si}+\text{Al})/\text{Si}$  that represents the ratio of the sum of the concentrations of the silicon and

---

aluminum to the concentration of the silicon in the target at 1 or more, and thereafter performing heat treatment in a nitrogen atmosphere or a nitrogen atmosphere containing oxygen at a temperature lower than the heat treatment temperature in the last-mentioned step

Get ready to fight with the Ragdoll! In this fast-paced action-fighting game you'll have to take part in three different tournaments all of them set in arenas, that in turn have five different maps. Each map is designed in a specific theme and has a different puzzle to solve, like "What's Your Name?" (a simple puzzle where the players will have to say their name by touching their character's head). Features:- Tournaments with more than 25 unlocks over the course of 15

---

maps- 15+ achievements to unlock- 15+ unlockable skins- Dozens of different objects to fight- Online co-op tournament and two PvP game modes- Full controller support- 15+ different teams- Over 100 weapons in this hack and slash game of fighting- Hints and help to win matches- Regrets- Unlimited coins

The hack and slash game genre has been around for as long as the games themselves have been around. Throughout the years, it has evolved a lot, but its core has remained the same: a little man that acts like a stick figure with a chain sword and a rubber band. Many famous games developed their fan base by exploiting this image. With "The Ragdoll", the hack and slash genre is back to its roots. You play as a ragdoll-like character (think Max Payne) and you'll have to fight with other ragdolls and some usual weapon (the punch things). No matter how you kill your enemies, they don't disappear. You'll have to destroy them by different ways and you'll

---

have to fight to win. The game is a mix of fighters and beat 'em ups. Can you discover what it is? Note: The version you're downloading is only the game's GUI. So you can't play it. You can only enjoy it. A new fighting game that delves into the hack and slash genre without reinventing the wheel, while taking it in a new direction. An authentic and classic hack and slash gaming experience enhanced with an awesome new twist, the ragdolls. With a variety of fun gameplay modes, enjoyable characters, killer weapons and very fast action, this game is a good value for money. Game "The Ragdoll" is completely free to play and available for windows and mac on our website. The game has no connection with Facebook. You can download the latest stable version of the game here: Ragdoll

**reviews** There are some nice memories set over but current

---

**expectations really weren't met other than a few that did not really stand out. Everyone has their personal views and taste but they simply are not enough to make a movie stand out alone. The long running love story with so much flops and repeats and disappointment that they get how much better their movies are. That said they do not really have the feel of a franchise as in you know the main characters and this thing just works like the sequel. Also mind you that the anthology is a long running film genre and is just not the type of movie to translate in video games. I'm not sure many people even consider video games but everything that has to do with movies has to deal with video games. Just the following list is a good sampling of the current state of the anime industry, Japan, and where this film fits in and why it doesn't automatically transfer well to a video game. The only one I really give a chance is the game and one of the movies is worth exploring. Maybe some of the ones that were as genre examples were placed in the wrong area of the wheel. Anyway... Slide into one of the following reviews and take a dive into the world of the Narcissu. Zero This is probably the closest I see out of the films. It started off like conventional anime from the beginning. The beginning had a mix of a flower-shooting scene and found footage. I was rather taken back how fast the film goes into the set up and the beginning takes place in snowy snowy. Very surreal but interesting. I enjoyed the fact that some of the students portrayed in the film as they try to handle the fact that a whole raft of other students have been killed. They explore that scene logically instead of by blowing up the school. The idea of the special forces walking around a city and everyone simply holding their breath. It made for interesting scenes where a lot of**

**anime just gets us in the action without much of an explanation. Once that happens the film takes off in a motorbike chase sequence where most of the action is in the three stories that occur. The first story started to get interrupted by the armaments example. It was something odd to see that characters spun around in a never going to be a challenge to hitting a moving target. It was very odd to see them spin around in what looked like paper thin air which I felt made scenes more fake and uninteresting. The overarching theme of school students fighting about who is better and who gets to have**
