While reading about python's garbage collector, I came across with few things and can't figure out how they work exactly. 1) I read that python's garbage collector is reference counting garbage collector and in reference counting garbage collector, things that are not referenced are garbage collected. I ran the following code and didn't see a big difference in output. I understand that as ca3bfb1094

With only a few clicks, send and incorporate feedback that is specific to the feature, module, or other element on which you focus. Import and incorporate feedback from printing, the Internet, or email. (video: 1:15 min.) Modify your AutoCAD drawings when you receive feedback through Markup import, allowing you to make changes to a drawing, share changes and revisions with others, and manage changes in a single, integrated workspace. Work faster with faster, smarter search results. Get intelligent search results for AutoCAD, drawing, and people with access to the drawing. Incorporate AutoCAD search results into your own work and share your work easily with colleagues. Work with the latest content. Get the latest updates to AutoCAD, including new AutoCAD tools and features, faster and easier to install. New functionality to allow you to share drawings and extensions with non-AutoCAD users. You can now use the new Share function with non-AutoCAD users who also have access to the drawing. When you save changes in a drawing and then share the changes with others, you can let non-AutoCAD users see the changes you made to the drawing, using your own menu bar and toolbar and only the changes you make in the drawing. You can also share drawings and extensions as cloud-based drawings. For Share drawings, use the Share as cloud-based drawing command. When you share a drawing as a cloud-based drawing, you get an email with an electronic link. You can use that link to access the drawing and view your changes anytime, anywhere. For extensions, use the Extension as cloud-based extension command. When you share an extension as a cloud-based extension, you get an email with an electronic link. You can use that link to access the extension. For your drawings, use the cloud-based drawings command. When you share a drawing as a cloud-based drawing, you get an email with an electronic link. You can use that link to access the drawing and view your changes anytime, anywhere. Enhancements to AutoCAD for mobile. You can now view your drawing on a mobile device, and you can also edit drawings on your mobile device. The keyboard shortcuts and menu options to add and remove layers on mobile are consistent with the desktop experience. You can create a tablet
