Please visit our website for more information, read our feature articles and don't hesitate to use our forums and ask questions. Helpful hints: When choosing which loader to use, always choose DX-R. The FX Core or DX-Vilaz.fsx loaders do not support DX-R. Most FBO's and Taxiways are modeled on DX-R. To do this, please ensure that your game config is set to run on DX-R, ie 'DirectX11' in Steam version of FSX: Steam Edition For best results, make sure you have DX9 installed on your machine, for windows XP use DX9 version of dxscnt.exe (Found in the DX9 folder in your Windows directory) All FSX models for DX-R are located in the FSX: Steam Edition content pack. The location is dxr\img\Steam\app\repositories\ DX-R gives you the option of using your FX11 textures and lighting

with your DX9 textures and lighting. By default it will create your own directory 'dxr\img\dxr\_fx11' and place your textures there. You can use all your textures and lighting if you wish. You can also copy your FX11 textures and lighting into your FSX directories if you wish. You can enable 'DX9 Graphics' in your game config

The elves themselves have already finished their harvest, and thus are melting snow and water into beer and wine, in order to celebrate the reign of winter, and since they will be all of their time in the colder months, they have elected the capitals of their colonies to be used as bases in the future operations. This of course means that since they are not limiting the number of elves in each base, and since their bases are mostly in the mountains and thus gloomy, the sun will barely be able to peep above the snowclouds from mid-spring to mid-summer. This of course means that the effects of luk-fire will also take effect, and thus there will be no sun to maintain the temperature in the lowlands and dales of Gilbret Nulle Est Moi! III.
