GAMEPLAY RECOMMENDED: INTERACTIVE, SUGGESTION, AND MULTIPLAYER: UNLIMITED The 'Developer' Distro - hrgeek ====== DrHankPym A lot of that is focused on Linux, but I really enjoyed your entire post, Robert. My only nitpick: "If you want to talk about a "developer friendly" distro for MacOSX, this is not it." Not true. My favorite Linux distro is one that helps you write your first kernel driver. ~~~ pdeva1 Good point. I'd like to keep the post focused and use it to show what we could/should build for the desktop. ------ mrkmcknz Robert I got to say great article. The Linux distributions have always been very confusing for a newbie to understand and unfortunately some of the open source community distros can be just as bad. Explore the Lands Between. The Lands Between are empty lands which have a combination of valuable resources, such as gems. When you enter the Lands Between, your consciousness travels a path with a variety of dangers in order to reach the Realm of Elden. The Lands Between are experienced not only as a vast world with unfamiliar places but also as a journey. The following is a brief introduction to the Lands Between. Feast Your Eyes on the Lands Between! While exploring the Lands Between, you can see scenes with various backgrounds depending on the different dungeons, and have encounters with enemies, and experience the actions of the characters or NPCs. Make Money in the Lands Between. During your travels through the Lands Between, you may meet NPCs who need your help with various jobs. As you help them, you may obtain rewards and receive rental income from the NPCs. By going back to the NPC's base and giving back the items you acquired, you can earn rental income. Craft Great Equipment. In the inventory screen, you can find various items that can be exchanged for items you need. You may be surprised to learn that you can acquire items that can only be acquired by defeating monsters. Because the stats of these items can be increased depending on the quality, you can now obtain items with even higher stats through craft jobs, such as blacksmithing and tailoring. Train Through Skill Cloning. The skill that you already have is called the original skill. By using the skill that you just learned, you can learn a different skill with the same effect. For example, the first skill to learn is the Art of Intimidation, but you can learn the Sea Route Skill, the Venom Technique Skill, and more after learning this skill. Learn the Legendary Weapons of the Elden. By acquiring the Weapons of the Elden, you can make your own weapon. As your weapon level increases, your attack speed will increase, and your accuracy will improve. Your maximum number of weapons will increase, and you can select the weapon that you wish to equip. Work your Way Up the Career Ladder. You can choose a career path, which can be altered at any point, as you advance in the game. Once you change your mind, you can adjust the skill in the corresponding field at any time. After a long journey through the Lands Between, you can even become an Elden Lord with powerful skills.

7/02 - Atla is a land of reanimated zombies, dead ghouls, and a strong smell of death. It is also ruled by the most powerful empire. Not much is known about the Land of Decay or the Empire of Dawn and East, but we know a little more about the under-dwelling federation: that they worship the Devil, their god Dusk, and their greatest spell.. 135719Sun, 23 Jul 2014 00:00:00 -0700Freakazoid: AVRAM A&S Studios, Transonic Games, White Stag Games, and Paradox Interactive are proud to announce that Baldurs Gate: Enhanced Edition is now in English. I was using a face tracking but it is not accurate and I am not able to get children's speech. For this I need the audio so that I can extract the audio and then track. I would like to ask if there are any method to track children's attention from the audio itself (not using face tracking) or by looking at people's face. I have done work around on the video but it is not very accurate. I want the work to be accurate (i.e. the distance between people and the location of people). A: The video you posted is from the government-sponsored social experiment, the Great Web Experiment The Great Web Experiment is a project designed by IBM and by San Francisco Bay area non-profits Presidio Graduate School, the Media Lab of the Massachusetts Institute of Technology, and the nonprofit Beyond Words. The goal of the Experiment is to investigate how children and adults can learn language by watching and interacting online. The Experiment uses a website where videos of people talking are uploaded to the website and played in random order to participants across different age groups. The government advertisement is widely visible, as you noted. In fact, I found it very hard to find. The actual experiment, however, is not particularly easy to access, and it is not what you are looking for. If you are looking for a child's behavior to be tracked in conjunction with a parent's attention, the actual experiment is not the best place to look. For your use case, I think the project may be more helpful to you than you may expect. They posted their data set for this project here. Q: Python - Login with OpenID Here is my problem, I use webapp2 and I have tried a lot of things before asking here. I managed to get the openID working. Now i want to login with the openID.
