FEM 1.001 PDF

The standard for cranes and lifting equipment. An important document for the design and installation of lifting equipment in Russia. In recent years, many cranes of various types began to appear in Russia that do not meet existing standards, so the draft standard for cranes and lifting equipment developed by TsNIIOMTP LLC received the approval of the Russian Union of Industrialists and Entrepreneurs. In this regard, now enterprises that are engaged in the design, manufacture and installation of lifting equipment must be guided by the standards developed at TsNIIOMTP.
