What that all adds up to is that I find Adobe Photoshop CC a really solid photo editing tool with numerous powerful features a beginner can use to swiftly create a few enticing images. I could easily envision this software as being the backbone of a photography studio, or perhaps to be used at the forefront of a brand's digital marketing efforts. The one-click deletion tip was a staple of other popular RAW editing programs, so Adobe is no-doubt making this "feature" popular again. It's a quick way to remove any item from an image provided that you have a grid set up on your canvas. It's not exactly Photoshop's favorite feature, but it's pretty darn good. Although InDesign can be used without the help of tools and features that make up the Adobe Creative Suite, you can also download and install the few tools that are not built-in to Photoshop. Start from the tools found in the **integrated palette** (the tools that you can find in the **Tool Palette**). However, you can still add additional **tools on the fly** by using the **Command** option, as well as create **instant custom tools** that will then appear in the Tool Palette. What's the best way to kick off my Photoshop review? With a 10 hour shoot. I took this photograph about four years ago of my brother's church in Southern California on a cloudy and rainy day during Sacrament meeting. I was supposed to shoot a short talk for the church in the morning but as anyone that has ever done anything than claimed they are, I messed up. I took this shot and returned the camera to my Mighty Bag and again forgot to take it out and shoot, so I walked out and took a seat and started waiting for Sacrament. I have since followed what could be considered a Parish Guideline and have never shot a Sacrament meeting before. Needless to say I was nervous but I was also pleased to have the opportunity. I have viewed the file countless times since 2004 and am pleased with the way it came out. Now, four years later, I went to Photoshop and have just about completed a face in making his face look more human. I hope it looks better than what I did four years ago. I'll let you know!
