Q: Exercise in a matrix inequality book Let $A=(a_{ij})$ be a $n \times n$ real matrix. Prove that if $a_{11} \leq a_{22} \leq \dots \leq a_{nn}$ then $\sum_{i=2}^n a_{1i} \leq a_{11}$ Let $B=\{i: a_{1i} \leq a_{11}\}$ Prove that if $a_{ii} > a_{jj}$ for all $i,j \in B$ then B is an interval of the natural numbers. A: As shown in other answers, the result is false if the a_{ij} are not positive and independent. Here is a counterexample for independent non-positive entries: $A=\begin{pmatrix} 0 & 2 & 2 \\ 0 & 1 & 1 \end{pmatrix}$
